

## INJECTOR BLAST MACHINE

### ZP 50

Injector blast pot ZP-25 is designed for manual blasting of smaller corroded surfaces, cleaning before applying protective layers, tarnishing of metal and other surfaces and for restoration work on wood, stone, metal and glas. It is used mainly by hobbyist and in small crafts. It can be used with many different abrasives except steel beads.

Standard injector blast pot ZP-50 contains:

- blast pot on wheels of volume 50 l,
- sand silo with a cover,
- sand mix valve,
- blast gun type ANI with steel nozzle Ø 6,
- blast hose - 3 m,
- air hose - 5 m,
- abrasive medium corundum 10 kg.

TEHNIICAL DATA	ZP-50
VOLUME OF POT	50 l
WORKING PRESSURE	3 - 8 bar
AIR CONSUMPTION	0.2 - 1.2 m <sup>3</sup> /min
DIAMETER OF NOZZLE	5 - 10 mm
DIMENSIONS	Ø550 x 730 x 920 mm
WEIGHT	18 kg
