Environmental Policy of FerroČrtalič d.o.o.

The company's management and all employees are aware that only an environmentally friendly company, which implements and meets all environmental standards, ensures a pleasant working environment and harmony with nature.

In the development and design of new solutions in surface treatment, we choose technical solutions that are also ecologically efficient, and we expect the same from our suppliers, external collaborators, and business partners.

The environmental policy of FerroČrtalič d.o.o. follows the principles of sustainable development and defines the company's environmental commitments.

The environmental policy is based on the following commitments:

- We strive to be environmentally friendly and minimize negative impacts, continuously improving existing practices and intensively developing and implementing more environmentally friendly solutions based on the most advanced technologies. We incorporate ecological solutions and legal requirements into the earliest stages of development activities and projects.
- We ensure proper waste management and pay special attention to waste separation. Additionally, we ensure the transportation of waste to collection centers where it is processed and encourage the reuse of waste packaging for shipping.
- We promote the efficient use of energy, water, and paper. We conserve energy through optimal air conditioning and heating of our premises.
- We comply with the requirements of environmental laws, regulations, and other commitments.
- We ensure a high level of human health and environmental protection, considering potential impacts on human health and the environment.
- We provide continuous education and training for employees, thereby raising their awareness of environmental protection.

Mojca Črtalič, Director
