

FerroČrtalič d.o.o. Environmental Policy

The company management and all employees fully recognize that only an environmentally friendly company which implements and meets all environmental standards is able to ensure a pleasant working environment and harmony with the surrounding environment.

When designing and developing new surface treatment solutions, we utilize technical solutions that are also ecologically efficient, and we expect the same from our suppliers, outsourced contractors and business partners.

The FerroČrtalič Environmental Policy follows sustainable development principles and lays down the company's environmental commitments.

The Environmental Policy is based on the following commitments:

- We make every effort to be friendly to the environment and to cause minimal unfavourable impacts, which is why we constantly seek to improve our existing solutions and intensely develop and introduce solutions that are friendlier to the environment by relying on cutting-edge technologies. We make sure ecological solutions and legal requirements are implemented in the earliest stages of development activities and projects.
- We consistently carry out proper waste management and place a special focus on waste separation. We also make sure waste is properly transported to waste collection sites for reprocessing. We promote the reuse of packaging waste by reusing it as packaging for shipping.
- We promote the efficient use of energy, water and paper. We also save energy thanks to optimal air conditioning and heating of our premises.
- We meet the requirements provided for by the laws, regulations and other commitments governing environmental protection.
- We ensure a high level of protection of human health and the environment and take due consideration of potential impacts on human health and the environment.
- We carry out ongoing education and training programs for employees in order to promote and raise their environmental protection awareness.
