

DRY ICE CLEANING

SODA BLASTING

CLASSICAL SANDBLASTING WITH SPECIAL ABRASIVES

# Remanufacturing solutions

**defining**, efficiently

**creating** and **analyzing**

technical cleanliness

**remanufacturing**

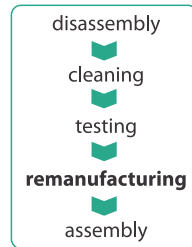

process on the **ecological** way

# Innovative and custom made solutions in remanufacturing

Remanufacturing is a 5 step process consisting of:

- complete disassembly of the product
- thorough cleaning of all parts
- detailed inspection and sorting of parts
- reconditioning or replacement with new parts
- product reassembly

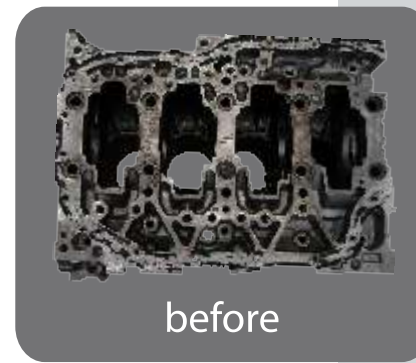

## Which part is covered by **FerroECOBlast®** in REMANUFACTURING?

EUROPE

FerroECOBlast is with its extensive knowledge and experience in ecological surface treatment technology perfect partner for this relatively new branch of industry.

## Benefits

- lower material consumptions
- lower energy consumptions
- safer working environment
- resource effectiveness
- ecology
- overall lower costs

**FerroECOBlast cleaning technologies are:**

Sand Blasting | Shot Peening | Dry Ice technologies | Soda Blasting
